

Automate Your Auto Lending Operations with Continuous

Give your indirect auto team the power to process and review eContracting and scanned loan packages with speed and accuracy—turning manual, error-prone workflows into a fully automated, compliant, and scalable process. With document classification, data extraction, and data verification automated, your team can reduce operational costs, enhance regulatory compliance, and elevate the dealer experience.

Simplify indirect auto funding from packet to payment: +-----

AUTOMATIC DOCUMENT CLASSIFICATION

No more manually separating PDFs trying to figure out where the retail installment contract ends and the gap insurance begins. Continuous identifies and separates the documents dealers send via multiple channels and in various formats automatically—email, eContracting platforms, scanned PDFs, smart phone-captured images—you name it.

LIGHTNING-FAST DATA EXTRACTION WITH HIGH ACCURACY

Continuous pulls key data points and checks them against other documents in your dealer jacket, delivering the results to your loan origination system and servicing platform.

DATA VALIDATION (BECAUSE “OOPS” MOMENTS ARE EXPENSIVE)

It's not enough to just extract data; Continuous verifies it. VIN mismatches? Inconsistent loan amounts? The system flags them before they become funding delays—or worse, regulatory compliance issues.

SEAMLESS SYSTEM INTEGRATION

Already using a loan origination or enterprise content management system? No problem. Continuous integrates with your existing systems of record, so data and documents flow where they should—without IT spending months untangling your tech stack.

SPECIALIZATION IN THE “HARD” DOCUMENTS

Transform your funding department into a high-speed automation hub. Continuous identifies required STIPs from the XML data and immediately goes to work validating proof of income, residency, and work eligibility. You can also enforce strict three-month recency windows on paychecks and perform cent-perfect income comparisons against your credit app data or retail installment contract.

With Continuous automating your indirect auto workflows, your team gains: +-----

- ✓ Reduced risk and operational costs with the automatic detection of missing or inaccurate data
- ✓ Stronger dealership relationships with repeat business by shortened funding turnaround times
- ✓ Confidence and control knowing every validation is logged and reviewable
- ✓ Peace of mind knowing month-end surges won't burn out your team

Scale securely and fund with confidence

Cut manual costs by automating document intake and review

Prevent funding errors with automated validation and compliance checks

Accelerate funding by automating deal jacket validation—review only when issues arise

Scale with confidence using a secure, easily integrated automation platform

Trusted by 1,600+ financial institutions

"I truly believe we could not have launched this in less than six months without the responsive and dependable support Continuous provided."

—SVP of Enterprise Technology, Top 10 Bank
