

Supercharge Your Symitar Core with Continuous Automation

Overview

Symitar has been the trusted core choice for numerous credit unions, designed to effectively manage data processing while maintaining system flexibility and security to meet a credit union's unique needs. Continuous simplifies Symitar platform administration—eliminating manual tasks, boosting productivity, enhancing operational efficiency, and allowing your IT organization to prioritize strategic initiatives over daily tasks, improving your member experience as a result. You can use Continuous to automate your core processes completely and elevate your operations by automating many of your non-core processes.

What You Can Do With Continuous

Integrate with many other systems and applications used within the credit union

Maintain compliance with regulatory requirements and security standards

Automate repetitive and time-consuming tasks

Scale your Symitar core system to handle increased transaction volumes and member demands as your organization grows and your operations expand

Optimizing Your Core and Non-Core Processes

Streamline Core Processes

Create efficient, end-to-end workflows for:

- Goodnight processing
- Daily ACH processing
- ACH origination processing
- OFAC check
- Exception reporting
- Fraud and BSA support
- IRA RMD
- Akcelant imports
- Payroll
- Draft processing
- Symitar report monitoring
- SQL extract processing

Automate and Orchestrate Non-Core Processes

Continuous delivers value beyond the core by automating:

- Loan and account origination
- Check imaging and remote deposit capture
- Online payments
- Mortgage processing and origination
- Credit card processing
- Reconciliations
- Cash management fraud detection
- Loading reports and data into COLD
- Loading data from multiple sources into data warehouses
